# WAVESYS

SEGMENT: SAFE CITY

SAFE CITY

The name itself iterates the significance of utilization of every possible safety measure there is. The increasing population, the rising incidents of terror, natural calamities, and other emergencies demand real-time information and regular insights into the situation. Wavesys constantly adapts emerging technologies and stays abreast with every innovation helpful to maintain high level of security anytime, anywhere.
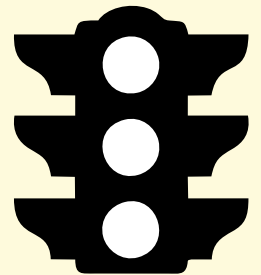

## SUREVEILLANCE FOR THE INDUSTRY

1 SAFETY

Different categories of cameras, specially customised analytics and the right networking can not just save people and property in a safe city but can also save a lot of funding for the government... after all a safe city is about saving everything.

2 TRAFFIC MANAGEMENT

Real time updates are essential in several areas of safe cities, traffic management being one of them. With the right combination of devices and tools regular updates can be provided to the public making lives easy.
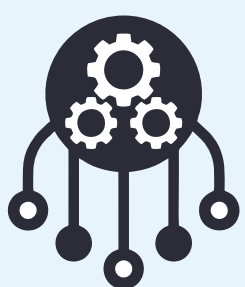

3 ESSENTIAL SERVICES MANAGEMENT

Surveillance can help in the management of essential services like water and electricity management and ambulance service among others.
