

# SEGMENT: TRANSPORTATION

## TRANSPORTATION INDUSTRY

Security surveillance in the transportation sector is a mammoth task. Firstly because of the increasing crimes and risks and secondly because the nature of the transportation sector itself is geographically extensive. However, Waveysy possesses the brilliance to deal with the challenges of implementing surveillance in the sector and the expertise to execute the ideas.

## SUREVEILLANCE FOR THE INDUSTRY

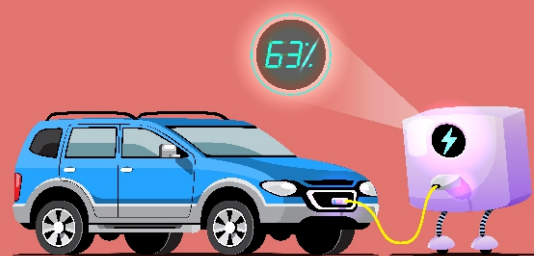

### 1 FLEET MANAGEMENT

GPS based surveillance of vehicles can help in not just identifying the delays and slowdowns but also in proactively judging and avoiding security risks in and around the vehicle thereby ensuring passenger and employee safety

### 2 VEHICLE SURVEILLANCE

Our advanced transportation surveillance solutions can assist organisations in identifying, reducing, and managing accidents and crimes or other unpleasant incidents.

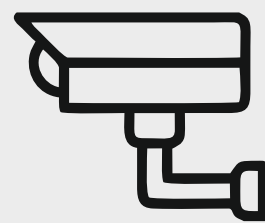

### 3 GENERAL TASKS

Surveillance solutions offer additional assistance to obtain simple data like the vehicle occupancy status to prevent overcrowding, checking passengers for masks, long distance object detection and so on.

## HOW THE INDUSTRY CAN BENEFIT FROM WAVESYS PRODUCTS

### 4 MONITOR & DETER CRIMES

Our solutions can be designed to identify suspicious individuals and objects thereby restraining a large number of crimes.

### 6 INCREASED SAVINGS

We use the cameras that are the most effective with expansive coverage of the location to offer highest cost savings.

### 5 READY AVAILABILITY FOR INVESTIGATIONS

Our cameras offer clear picture and video insights that can help investigators resolve any major security incidents efficiently and easily.
